

## RIIMPO208F Operate support equipment

### OVERVIEW

This course focuses on practical components for any of the following plant machinery: telescopic handlers, excavators, backhoes, vibrator rollers, sheep foot rollers, front end loaders, integrated tool carriers, and skid steer loaders. Please note that this course is not available at Equip-Safe's Welshpool training facility and must be conducted on the client's premises.

### CONTENT

The practical training includes conducting a risk analysis, completing pre-operational checks, demonstrating equipment controls proficiency, and performing tasks such as filling, dumping, and leveling soil/material with attachments. It also covers routine checks, load shifting, and equipment shutdown procedures. Emphasis is on workplace safety, following the manufacturer's instructions, and implementing effective hazard control measures.

### REQUIREMENTS

This training is conducted on the client's premises.

### DURATION

1 day.

### PRICE

Price on application, please contact Equip-Safe to discuss.
