

EQUIP-SAFE EQUIPMENT & SAFETY COURSES

RIIMPO208F Operate support equipment

OVERVIEW

This course focuses on practical components for any of the following plant machinery:

- Telescopic handlers
- Excavators
- Backhoes
- Vibrator rollers
- Sheep foot rollers
- Front end loaders
- Integrated tool carriers
- Skid steer loaders

CONTENT

The practical training includes conducting a risk analysis, completing pre-operational checks, demonstrating equipment controls proficiency, and performing tasks such as filling, dumping, and leveling soil/material with attachments. It also covers routine checks, load shifting, and equipment shutdown procedures. Emphasis is on workplace safety, following the manufacturer's instructions, and implementing effective hazard control measures.

REQUIREMENTS

This training is conducted on the client's premises.

DURATION

1 day.

PRICE

Price on application, please contact Equip-Safe to discuss.

Please note: Support equipment courses can only be conducted on client's premises. Depending on client's individual requirements, courses for individual or multiple pieces of equipment may be completed. For individual enquiries please contact Equip-Safe.
